SCHOOL DISTRICT OF BAYFIELD

SUGGESTIONS FOR IMPROVEMENT

The Board of Education believes that a cooperative effort among students, family, primary care givers, staff and community is essential to the educational process. Therefore, the Board of Education welcomes and encourages suggestions for improvement which might result in improved services, improved procedures, improved performance by employees, improved efficiency, monetary savings or other benefits for the district, its pupils, citizens and/or employees.

The Board of Education hereby urges any person who might have a suggestion for improvement in any aspect of the district operation, to make that suggestion known to the District Administrator. Suggestions should be submitted in written form. Each suggestion made shall be given full consideration. The person making the suggestions shall be informed of action taken by the District Administrator. If the matter is such as to require the attention and action of the Board of Education, it shall be brought before the Board for final approval and implementation.

If the individual making the suggestion is not satisfied with action taken, he/she may request an appearance before the Board at a regular meeting to present the suggestion directly to the Board.
