

TO: Superintendent and Board of Education
FROM: Steve Dunn
DATE: March 3, 2014
SUBJECT: March Report

Buildings and Grounds: There have been many repairs to the building and its heating system due to the extremely cold temperatures this year. Two heating coils, two Trane V.U.V.E units with hot water reheat coils, water heater, valves and roof issues to name a few. MEI performed a Moc OSHA inspection last month and I will include the summary of their report.

Transportation and Vehicles: Bus #2 and the mini bus will get new driver seats this month, they are falling apart.

Safety and Crisis Management: I will be attending WSSCA's 46th annual School and Safety and Security conference this month. This year there is "safer schools through preparation" and topics include: Developing emergency operations plans, Alice crisis training, preparing and active school shooter situation, and making you school safer and more secure.

Planning and Projecting: Gathering prices and quotes for new bleachers and cafeteria tables. Both are well beyond their years of service.

Staff and Personnel: Nothing to report
