Athletic Director Report

April, 2014

Middle School Athletic/Activities Director Concept:

It has come to our attention that it will be useful to have within our school an additional position to direct the middle school athletics/activities program. This position will be very useful in accommodating the middle level needs in regards to activity planning and coordination. The level of attention and time needed to build a strong middle school program has never been so noticeable to our students and parents this year.

This additional program will be revenue neutral. We are able to use the current school athletic budget to adequately provide for the position. We are confident that the additional position will not have a negative effect on the overall athletic program. This will increase our ability to communicate and interact with the parents/students of our middle school program.

Please consider this as an option for the next school year 2014-15. If the concept is approved, a job description and budget summary will be provided at the next school board meeting in May.

Thank You
