

School District of Bayfield Board Report

Sandra J. Raspotnik, Director of Pupil Services/Special Education
January 6, 2010

Since the last Board Report the Special Education Staff has continued to work on its restructuring. We have swapped a few rooms and have reassigned some of the Instructional Assistants. As you will notice on the agenda we did have one of our Special Education Teachers resign his position. This came as quite a surprise and with regret, but we are moving on to make this as seamless of a transition as possible. There have only been a couple of days in the new year and it is too early to make any type of assessment on how this restructuring will work. I appreciate the board's support in making this change happen.

I would like to take this opportunity to thank the board for allowing me to work in this district. I have enjoyed the many successes, been excited by the challenges, and learned from the mistakes.
