

IT Systems Administrator Report

August 8, 2012

1. State Coursework Completion System report was submitted.
2. The software for the wireless system has been upgraded, and I am working on creating a public wireless network that will allow internet access for guests, but protect our internal network from intrusion.
3. Standard equipment replacements are being prepared for staff and for student labs. Computers are generally replaced every 5-6 years, though that varies.
4. The file server is in the process of being replaced to increase storage capacity, and we are starting to virtualize other production servers.
5. Servers and computers are being updated/upgraded with the latest software and security updates.
6. Scheduling and preparations for the new school year are ongoing.

Chris Plansky
IT Systems Administrator
