

Scott Stralka  
Principal K-12  
School District of Bayfield  
Report to the Board  
February, 2013

January 11: I attended a C-Tech training at CESA 12 with Sandy Raspotnik and Dave Doering. This training provided information and an opportunity to explore the possibility for teacher vocation training, curriculum and resources to three northern WI high schools for the purpose of conducting a research based study to determine the effectiveness of three programs. The programs include Introduction to Telecommunications, Introduction to Networking Copper-Based Systems and Introduction to Home Entertainment Audio/Video Systems. Dr. Judith Hankes and Dr. Gerald Fast, professors at the University of WI – Oshkosh will direct the research study. We are still evaluating this opportunity and plan to meet again in the spring.

January 18: End of the second quarter. This was an early release day for our staff and students. Staff completed their report cards. On this day, I participated with the middle school staff playing in the Middle School All Star Basketball Game against the students. We all had a great time.

January 28-Feb 1: High School students worked diligently on their class projects / decorations for Homecoming. The Senior class pulled out a victory for the Homecoming activities. The students did a great job of following our “Strive for Five” expectations during that week.

January 28 – February 7: This is the testing window for our Universal Screening that the staff will conduct with their students. They will be utilizing our STAR testing to test their reading and math measurements.
