

TO: Superintendent and Board of Education

FROM: Steve Dunn

DATE: April 18, 2017

SUBJECT: April Board Report

Buildings and Grounds: Heating and ventilation units in rooms 314 & 316 have been rebuilt and are up and running. Room 201 received a new supply control valve last week. Many heat related issues were taken care of during the spring break. We have been chasing roof leaks here and at the island school all spring.

Transportation and Vehicles: All school vehicles are doing fine. The oldest mini bus received new seat foam and seat covers that were ripped and broken. The Express van is still on the island because there is not enough students riding to warrant the bus.

Safety and Crisis Management: Tornado drill this week and a Mock vehicle crash on the hill to include emergency services next Thursday. Buildings and Grounds Safety meeting on Thursday, April 20 about power run through school forest.

Planning and Projecting: Planning summer projects – playground site leveling, fence repair, roof repairs, gym divider curtain, stage curtain repair, exterior paint on island school and new five alarm system at the island school.

Staffing and Personnel: I have a full summer crew now. Looking to change island bus driver/custodian duties.
