

## SCHOOL DISTRICT OF BAYFIELD PRIORITY SETTING

The Board of Education recognizes the value of setting priorities for school improvement. Therefore, the Board and Administration shall assess District-wide needs and concerns, and translate such concerns into achievable priorities.

Once District-wide priorities are established, the Administration shall develop an action plan that includes building level goals and objectives and timetable to facilitate successful completion. Priorities shall be monitored and adjusted, if necessary, throughout the year. It is recognized by the Board that some priorities can require more than a school year to complete.
