

BOARD POLICY

Advanced Mathematical Calculators

The School District of Bayfield will provide calculators with advanced mathematical functions for students enrolled in mathematics courses.

The Board of Education recognized that participation in mathematics courses requires the availability of calculators with the capability of doing advanced mathematical functions.

The Board further realizes that calculators as described above are expensive and the cost would cause undo hardship on many families of the District.

With a \$50 refundable deposit, the Board will provide calculators for those students taking math classes that cannot afford their own.

A check out form will be signed by the parent/guardian and the student, and a receipt for the \$50 deposit will be issued. After the form is filled out and signed, and the \$50 deposit is paid, a calculator will be issued to the student. The student is required to return the calculator in working order to the school at the conclusion of the student's involvement in the class. At that time the \$50 deposit will be refunded.
