Professional Development – Summer of 2010

Dave Doering

Dave attended a 4 day STEM Training Curriculum Development Workshop and he also went to the Midwest Renewable Energy Fair and attended workshops and presentations on renewable energy, home construction and alternatively powered vehicles. He also gave a presentation on The School District of Bayfield Electric Vehicle.

Rick Erickson

Rick completed the first half of the teacher-ranger-teacher program with the Apostle Islands National Lakeshore (20 days)

Leon Filipczak

Leon took a class in Ojibwa Language and a training workshop on Interactive Whiteboard.

Maria Waite

Maria participated in the Technology Training presented by Dave Roseth and Shellie Swanson.

Missy Eid

Missy attended a 3 day advanced Level Training for PBIS Coaches. She also participated in the Technology Training and Interactive Whiteboard training presented by Dave Roseth and Shellie Swanson.

Sue Ward

Sue attended a 4 day STEM Training Curriculum Development Workshop and she also participated in the Technology Training and Interactive Whiteboard training presented by Dave Roseth and Shellie Swanson.

Mark Dooley

Mark took the ACT 31 training at UW Milwaukee this summer.

Beth Hoagland

Beth participated in the Technology Training and Interactive Whiteboard training presented by Dave Roseth and Shellie Swanson.

Shellie Swanson

Shellie has been working now for three summers on a Design Team at CESA 12 in Ashland on the Digital Information Fluency project (DIF). Funding is provided through an Enhancing Education Through Technology grant (EETT). She started as an initial

design member in 2008. In 2009 she continued designing as well as mentoring fellow teachers. So far in our district three teachers have been introduced to this program and mentored by Shellie. The teachers are Karen DePerry, Andrea Boulley, and Beth Hoagland. Last year worked really well as Mrs. DePerry and Ms. Hoagland allowed Shellie to team-teach the technology components in their core-subject area classrooms. They infused it into their math and science lessons. This will be her final year participating in the design team but she will continue to mentor teachers in our district. This year Shellie will be mentoring Susan Ward. Her main goal is to infuse technology right into current lessons so that students are meeting the technology standards by 8th grade.

Curriculum Expansion

We have received word from CESA that the person in charge of the EURO curriculum project is having health problems and is being put on hold until 2nd semester.
