

# **IT Systems Administrator Report**

## **April 17, 2013**

1. The tech committee is working on updating the District Technology Plan. Our current plan expires at the end of June. We have worked with the previous plan and updated our goals and action plans.
2. Work continues on creating documentation of the network and servers, as well as work to virtualize our servers.
3. Title 1 funds are being used to expand the number of computers available to students. A third new mobile lab will be available soon to students.
4. The District is working with the DPI on piloting the Smarter Balanced Assessment testing. Software was installed and tested, and is being used with middle school students for testing.
5. Work continues on switching to Google for email and cloud based services.
6. Items are being considered for the 2013-2014 budget. A new telephone system and updates to the wireless network controller are two of the “big ticket” items under consideration, along with the normal replacement cycle of computers, servers, network equipment, and peripherals.
