

Technology Coordinator Report

May 5, 2010

1. 10 technology jobs have been opened since April 26, 2010 and 7 jobs have been closed.
2. Conducted a meeting with the people who have active boards and those who would like them for next year. We discussed how they are working, how they are being used in class and what we need to do for people as far as training is concerned. Interest is high and I am trying to schedule training for this summer. We should have 21 boards installed next year.
3. Working on the District's tech plan continues. This three year plan is up for renewal and is required by the DPI and federal government.
4. We recycled a number of pieces of equipment this past week with 5R processors from Ladysmith. They are a certified recycler and provide data destruction procedures that protect our data. We received a great deal from 5R that will keep costs down.

Troller Pride

David Roseth
Technology Coordinator
