

## **Technology Coordinator Report**

### **January 11, 2010**

1. Over the holiday break I came in and prepared 36 Apple computers for use in the District. 18 are desktop computers for use in the LRC and 18 are laptop computers that will be housed in the LRC and put on a mobile cart for use throughout the building in Bayfield. These computers were purchased through our Literacy by the Lakeshore grant.
2. We have purchased 10 Promethean ActivBoards for use in the District. These are interactive whiteboards that will be used for classroom instruction. The District received a deal where we purchased 5 and got 5 free. A survey has been sent out to staff to gauge interest of piloting the boards. An implementation plan will be developed to determine where the boards will be placed and an implementation schedule. The boards are being purchased with Microsoft settlement money.
4. 31 Jobs have been opened since December 9, 2009 and 41 jobs have been closed.

Troller Pride
