

Athletic Director Report October 23, 2012

The fall season has ended with positive results in Volleyball, Cross Country, Football, Soccer and Middle School Girls Basketball. Student athletes have ended their season and are getting excited for the winter sports to arrive in early November.

The Volleyball team ended with a winning record and made an appearance at the Regional Finals vs. Luck High School. The team lost the game but played hard throughout the contest. Good Job to the coaching staff and players, we can build upon the success and look forward to next year. On behalf of the seniors on our team(s) we thank them for their efforts and wish them well.

The cooperative Football and Soccer programs continue to work at building their programs with our students going to Washburn to practice and play the games. I have talked to the coaches and have started to collect data and ideas of how we can start building the programs at the lower level elementary and middle school. This would in effect give our students the confidence they would need prior to joining the cooperative teams. I will continue to work on this and begin to look at the budget, equipment and necessary needs to build the programs.

The Cross Country and Middle School Girls Basketball teams finished their programs with success. Our goal for the coaches (for all teams) and players is to keep the programs running through the school year and summer. The coaches are planning more events and activities that would allow our athletes to continue on participating with their teams. Of course this is voluntary; we will work on parent involvement, etc. to keep things rolling.

Winter Sports are coming next.....I will keep everyone updated through the school website, team calendars and the Red Cliff Charter channel.

Sincerely submitted,

Jeff Gordon, Athletic Director
