

TO: Superintendent and Board of Education

FROM: Steve Dunn

DATE: 3/5/17

SUBJECT: March Board Report

Buildings and Grounds: Room 314 and 316 will have new heater/vent valves, coils and controls installed to remedy the problems we have had with them. Many roof leaks will be repaired as the weather warms up, including a few on the Island school building.

Transportation and Vehicles: School vehicles and buses will be rotated for service this month. The ferry Aide/monitor position is a constant battle to keep someone doing the 8:00am run.

Safety and Crisis Management: Tornado and Severe Weather Awareness Week April 17-21. We will take part in the statewide tornado drill on April 20 at 1:00pm. The elevators have received new emergency lighting batteries and phone line repairs.

Planning and Projecting: Lining up work for Spring Break. Room 320 is getting remodeled for Special Ed. The dropped ceiling is going to be removed and the concrete ceiling above will be painted black with 6 new LED lights replacing the old units. Reason: Students were climbing on tables reaching up and pulling tiles down.

Staffing and Personnel: Having trouble with getting the 8:00 ferry aide/monitor covered. Also I will be advertising for custodial subs.
