

## **IT Systems Administrator Report**

### **June 6, 2012**

1. Planning for next year is ongoing. Some of the major purchases that are being considered are a computer lab, replacement of mobile computer labs, upgrades for the wireless system, a telephone system replacement, server virtualization, and interactive whiteboard technologies. Standard equipment rotations will also take place.
2. State reporting for the Coursework Completion System will begin as soon as school is out.
3. Summer projects that are being planned include creating a public wireless network for visitors to the school, updating software on all computers and servers, and creating a computer and software inventory.
