

### Agenda Item Details

Meeting	Jul 25, 2022 - Regular School Board Meeting
Category	3. Administrative Reports
Subject	3.8 IT Systems Administrator Report
Type	Information, Reports

Summer projects continue. This year's batch of new Chromebooks are being set up, and all of the Chromebooks from previous years are being reset and tested to get them ready for the new year. To minimize problems we have had with missing and damaged Chromebooks, middle school students will no longer bring their Chromebooks home, except for special circumstances. They will pick them up each morning and return them to their classroom cart each day.

Elementary students will still have their Chromebooks kept in classroom carts, and high school students will still be able to take them home.

Supply chain problems continue, so not all installations will be done by the time students start school, but we will make the best of the situation. We should have all the computers we need, but some items, like interactive whiteboards and displays, may be installed later, during the school year.

Ongoing summer projects:

-The new surveillance camera and door access system is in progress. Most of the cameras are installed, except where construction is ongoing. The door access system is installed, but still needs to be connected to the doors. HBS will be back July 25th to finish that portion. When that is complete, we will finish programming the system. We are also waiting on wiring to be installed for a few of the cameras. We are working with Norvado and Jolma Electric to get this portion finished.

-The replacement of our classroom paging speakers is still ongoing. Construction is preventing this from proceeding at this time, but we will have the speakers programmed and ready to install when construction completes.

Cybersecurity training is still being planned for the fall. The focus this year will be on student data privacy, and securing our most important systems online with multi-factor authentication. As we move forward, we will also be improving our monitoring and reporting systems for our computer network.

Respectfully submitted by Chris Plansky, IT System Administrator

This meeting is a meeting of the Board of Education in public for the purpose of conducting the School District's business and is not to be considered a public community meeting. There is a time for public participation during the meeting as indicated in the agenda.
