

**Agenda Item Details**

Meeting	Sep 22, 2022 - Regular School Board Meeting
Category	3. Administrative Reports
Subject	3.8 IT Systems Administrator Report
Type	Information, Reports

We have wrapped up our summer projects, and are moving into the school year. The video surveillance and door access project is complete, with the exception of one camera that is awaiting the installation of a mount. Already I have been asked to expand the system to include the elementary playground area. That project will be considerably more complex, as we will need to run electricity and network wiring from the building out to the playground, probably underground. I will be contacting the vendor that installed the system to get more specific details on what will be needed. Another addition to the system we are considering is environmental monitors for bathrooms, to detect smoking or vaping in those areas.

Supply chain issues are still holding up interactive whiteboard installations in 2 classrooms, but the rest have been installed. The affected classrooms already have existing interactive projector systems, so the disruption to learning is minimal.

Multi-factor authentication is in place for staff Google accounts. The student information system, Infinite Campus, will also move to multi-factor authentication sometime this fall. Computer security is part of our ongoing training as well. Security will continue to be a focus of the IT department as we move forward.

This meeting is a meeting of the Board of Education in public for the purpose of conducting the School District's business and is not to be considered a public community meeting. There is a time for public participation during the meeting as indicated in the agenda.
