Agenda Item Details

Meeting	May 15, 2023 - School Board Meeting
Category	3. Administrative Reports
Subject	3.9 IT Systems Administrator Report
Type	Reports

We are still planning and preparing for summer projects. These projects include:
- switching internet, telephone, and long distance services at the Bayfield building to Norvado from our current vendors
- interactive whiteboard for 3rd grade - waiting for summer
- room 328 whiteboard and interactive projector - waiting for summer
- playground surveillance cameras - planning with vendor
- virtual host server replacement - 1 server on order, will install in summer
- wireless system for outdoor classroom - waiting for summer, planning with Joel Shilman
- adding network, door access, surveillance, and telephone systems to generator backup - planning with Joel Shilman, waiting for summer, and electric work

Infinite Campus setup for summer school is ready to go. As we move forward with enrolling students, we will make any necessary changes.
Also, student assessments are pretty much wrapped up. The IT department prepares the Chromebook apps and caching servers, and supports staff and students as necessary during this time. We will be turning off the caching servers when we know all tests are complete.

We are also starting to assess our website and our app to see how we can improve outreach and engagement with families and the community. We have been approached by a vendor regarding this issue, but we will be spending the time to talk about our goals for the website and app, improvements that can be made with our current system, and the advantages and disadvantages of finding a new vendor.

Respectfully submitted,
Chris Plansky
IT Systems Administrator

This meeting is a meeting of the Board of Education in public for the purpose of conducting the School District's business and is not to be considered a public community meeting. There is a time for public participation during the meeting as indicated in the agenda.
