

Agenda Item Details

Meeting	Dec 18, 2023 - Regular School Board Meeting - Updated Start Time
Category	3. Administrative Reports
Subject	3.7 IT Systems Administrator Report
Type	Reports

The DPI did their scheduled data snapshot on December 5th, which they use to assess our student data from the previous school year, as well as the third Friday of September and October 1st count dates. We have been preparing for that snapshot in recent weeks, clearing up errors and missing data points.

Cyber security and data privacy are primary concerns this year. We are planning a cyber security assessment for February 6th, 2024, with members of the Wisconsin Cyber Response Team (CRT). They will be onsite and meeting with district staff to assess our district's preparedness for dealing with cyber security attacks. This assessment will help guide us develop our cyber response plan and improve our security infrastructure and practices.

Regarding student data privacy, we are continuing our work with the Student Data Privacy Consortium to sign student data privacy agreements with the various websites and services that we use for education. Our goal is to protect our students' data from being harvested and sold by vendors.

We are continuing to consider future infrastructure projects. Replacing our aging network wiring is still at the top of the list for our priorities, and we are considering how we should move forward. Technology has changed a great deal since the network was wired over 20 years ago, and we want to consider these changes and plan for the future.

This meeting is a meeting of the Board of Education in public for the purpose of conducting the School District's business and is not to be considered a public community meeting. There is a time for public participation during the meeting as indicated in the agenda.
