

Agenda Item Details

Meeting	May 19, 2025 - Regular School Board Meeting
Category	3. Administrative Reports
Subject	3.6 IT Systems Administrator Report
Type	Reports

As the year winds down, we are looking at the projects we will be doing this summer.

- We will be updating our wireless network with new access points throughout the building.
- We will be upgrading any computers that are still running Windows 10, as support is ending for Windows 10 in October this year.
- We are still considering our replacement plan for our servers running on VMware, a virtual machine hosting solution. We will probably switch to a combined solutions of physical servers and a cheaper Linux-based virtual machine hosting solution, but no decision has been made yet.
- We hope to replace the firewall and wireless access points at LaPointe School, and replace a network switch at Bayfield School.

We are attending a cybersecurity training May 14, as we move forward with our security training. It's a cybersecurity foundations training, where we will learn how to prepare for and react to cybersecurity incidents. After completing the training, we can also join the network of trained technicians that help react to security incidents statewide. Training and preparation for cybersecurity becomes more important every year.

Respectfully submitted,

Chris Plansky

IT Systems Administrator

This meeting is a meeting of the Board of Education in public for the purpose of conducting the School District's business and is not to be considered a public community meeting. There is a time for public participation during the meeting as indicated in the agenda.
