

**Agenda Item Details**

Meeting	Oct 28, 2024 - Regular School Board Meeting
Category	3. Administrative Reports
Subject	3.5 IT Systems Administrator Report
Type	Reports

The beginning of the new school year is a busy time. We wrapped up room moves, setting up new students and staff, and completed summer projects as we were able. Now we are working on a number of data projects. We synchronize data with the state WISEdata system, and we are working through setting up that process for the new year, as well as double checking and troubleshooting any errors we have with last year's data, and the updated sync process and additional data collection for this year's data. Additionally, because we no longer have a Dean of Instruction, the IT staff are now responsible for managing student accounts in some of our educational and assessment software services, like NWEA MAP assessments.

The upgrade of our wireless access points has been postponed until a later date. Due to the design of our wireless management system by our vendor, we will need to take all of our current access points (roughly 50) offline before we begin installing the new ones. Because this may take 2-3 days to complete, we are waiting until we have a longer school break and both IT techs are available to work on the installation. This will probably be either spring break or next summer. The current system will support us until then.

Other ongoing projects include installing our new security software, and research and development of new alternative directory authentication systems and server virtualization options.

Respectfully submitted,

Chris Plansky

IT Systems Administrator

This meeting is a meeting of the Board of Education in public for the purpose of conducting the School District's business and is not to be considered a public community meeting. There is a time for public participation during the meeting as indicated in the agenda.
