

**Agenda Item Details**

Meeting	Sep 15, 2025 - Regular School Board Meeting
Category	3. Administrative Reports
Subject	3.7 IT Systems Administrator Report
Type	Reports

School is back in session and things are busy.

Summer projects are wrapping up. These projects are ongoing:

- We are still in the process of upgrading and replacing computers running Windows 10, which will be end-of-life in October.
- Our new Windows domain and print server is up and running. There is still some setting up to do, and we will begin switching over our printing as we move along. The old print server will probably be shut down at the beginning of October.
- Our other servers running Linux will be replaced in the future, by either physical computers or virtual devices. We are still testing an open source solution to host virtual servers.
- The new firewall and wireless access points for LaPointe School will be configured soon and we will install them as we are able.
- We have our new point of sale (POS) computers for food service at both Bayfield and LaPointe Schools on site, and we will replace them soon.

We are dealing with our normal beginning of the year rush as staff and students return, and we get everything set up of the new year. Our focus is to get through the beginning of the year rush, and to complete the switch to our new print server.

Respectfully submitted,

Chris Plansky

IT Systems Administrator

This meeting is a meeting of the Board of Education in public for the purpose of conducting the School District's business and is not to be considered a public community meeting. There is a time for public participation during the meeting as indicated in the agenda.
