

Agenda Item Details

Meeting	Mar 16, 2026 - Regular School Board Meeting - Revised
Category	3. Administrative Reports
Subject	3.7 IT Systems Administrator Report
Type	Reports

I attended the Brainstorm K20 educational technology conference at the beginning of March, and attended sessions on primarily about security and network monitoring, as well as making contact with current and potential vendors. This is an annual conference, and is particularly useful for both learning and networking in an environment that focuses on primarily on learning and communication, rather than being entirely focused on vendors.

We are gearing up for the state Forward test right now, and getting things ready. We also recently had ACT testing. So far, things are going pretty well from an IT perspective. The only issues we had were with re-programming the bell system, and that has been worked out.

We are also working on the LaPointe School project, and preparing for the construction. We will remove technology from the building, and reinstall it when the project is complete. This includes the copier, networking equipment, interactive whiteboards, and security cameras, Student Chromebooks, teacher computers, and the printer will be moved to the temporary school site.

Due to changes in the network and servers at the Bayfield School, we will be working on updating our documentation. This has been an ongoing project, and we hope to develop both online and printed documentation of the network and server infrastructure, as well as a list of day-to-day and scheduled tasks performed by the IT staff throughout the year.

Respectfully submitted,

Chris Plansky

IT Systems Administrator

This meeting is a meeting of the Board of Education in public for the purpose of conducting the School District's business and is not to be considered a public community meeting. There is a time for public participation during the meeting as indicated in the agenda.
