

**Agenda Item Details**

Meeting	Apr 27, 2026 - School Board & Organizational Meeting - Revised
Category	5. Administrative Reports
Subject	5.7 IT Systems Administrator Report
Type	Reports

Our state testing has mostly wrapped up, and we are now focusing on the upcoming DPI data snapshot in May, and reviewing our data in Infinite Campus to clear up any reporting errors. We are also working on a list of summer projects for the year, many of which will focus on security, documentation, and the LaPointe School project. At LaPointe School, the technology was mostly removed from the building, or to the temporary location. The network will be rewired as part of the project, and we will add some new security cameras as well as electronic door access.

Due to changes in the network and servers at the Bayfield School, we are working on updating our documentation. This has been an ongoing project, and we hope to develop both online and printed documentation of the network and server infrastructure, as well as a list of day-to-day and scheduled tasks performed by the IT staff throughout the year.

Another ongoing project is organizing our cloud storage in Google, and setting up online cloud storage for various role-based functions, like finance and HR. I am working with the district administrative assistant, and finance staff on this task as it continues to evolve.

Respectfully submitted,

Chris Plansky

IT Systems Administrator

This meeting is a meeting of the Board of Education in public for the purpose of conducting the School District's business and is not to be considered a public community meeting. There is a time for public participation during the meeting as indicated in the agenda.
