

SCHOOL DISTRICT OF BAYFIELD

110

EDUCATIONAL PHILOSOPHY

The School District of Bayfield believes that its major purpose is to provide experiences that will enable each student to develop intellectually, emotionally and physically. The District believes that in providing these experiences, educational programming will maximize each student's abilities and be responsive to student needs and interests.

The educational program, as a contributor to the development of each student, is a collaborative and on-going venture of the Board of Education, local communities, administrators, teachers, families and students.
